**C. Please describe which target groups you have contacted and what is their reference to the project objectives.**

We have reached with the information about the project 1300 people in media, 5700 in Internet, and almost 400 people in person. Among them 14 stayed in the Stakeholders Committee and 13 belongs to the project work team working on interviews, articles, social media and other tasks within the project. The staff members: technicians, researchers and the coordinator are working closely, meeting almost every week specifically to talk about DC-TEST development. We have also engaged 16 tourism experts for the interviews and further cooperation for dissemination of project results.

Short term impact thereby embraced: competence development of the Postal3 team members (13 people trained regularly offline and online), engagement of different stakeholders in the Committee of Stakeholders and more than 50 organisations and over 400 contacts to be informed about the latest project development regularly.

## DISSEMINATION REPORT

Also, the team members have better self-knowledge, they are more aware of their potential as coordinators, as well as they have improved cooperation within the team. The staff improved its expertise in DC competence framework, non-formal education, coordination and coaching a group of students.

We have also made a lot of important contacts that will benefit for the future, not only in disseminating project results and improving entrepreneurship education in Spain, but also will strengthen potential cooperation in the field of Digital Competences among different stakeholders in general.

The potential for the pilotage and wide use of the intellectual output is thereby very promising and the quality of intellectual outputs is secured by cross-sectorial and interdisciplinary Stakeholders Committee.

Last but not least, we are involved in a new project of digital competences where we can take advantage of our knowledge and experience in DC-TEST.

### D. Please provide quantitative data (for the whole period) related with the indicators below

Number of people reached through face to face events	474
Number of people reached through web based dissemination (direct mailing, articles in websites, social media etc)	5700
Number of publications in websites	2
Number of other publications	0
